

Aesthetically Pleasing

Great aesthetics go a long way in showcasing any structure. Bonded Lightning Protection Systems, Ltd. (Bonded) offers versatile, architectural accents designed as a stylish compliment to any lightning protection system for residential and commercial applications such as; cupolas, dormers, roof ridges, turrets, pavilions, and gazebos. Ornamental components include weathervanes, glass and copper globes, finials, bases (required for some) & other accent pieces (see back for details). The configurations of these components are only limited by your imagination. Whether new construction or historic preservation, ornamental components will add the perfect touch of elegance to any structure.

Service Program & Warranty

Service is fundamental in ensuring the protective performance and compliance of a structure's lightning protection system. A properly designed and installed lightning protection system requires minimal service; typically only when modifications are made to the structure or when the system sustains damage by other trades or natural disasters. Modifications can include, but are not limited

to, roof renovations, camera(s) and/or antenna installations, HVAC alterations, etc. To optimize the protective functionality of your lightning protection system, Bonded offers comprehensive Service Program Agreements in one (1) and three (3) year increments; with the options of inspections, ground testing, and certification

About Us

Bonded was established in 1950 and is a faith-based, family owned company. The corporate office is located in Argyle, Texas; with installation offices throughout the southern United States. Bonded believes in and works diligently to achieve its Mission. All employees strive to uphold the company Core Values as outlined on our website:

BONDEDLP.COM

Mission

To protect every vulnerable structure in the United States from the devastation of lightning.

Finials grounded

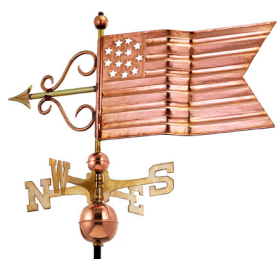

Weather vanes
