**BONDEDLP.COM**

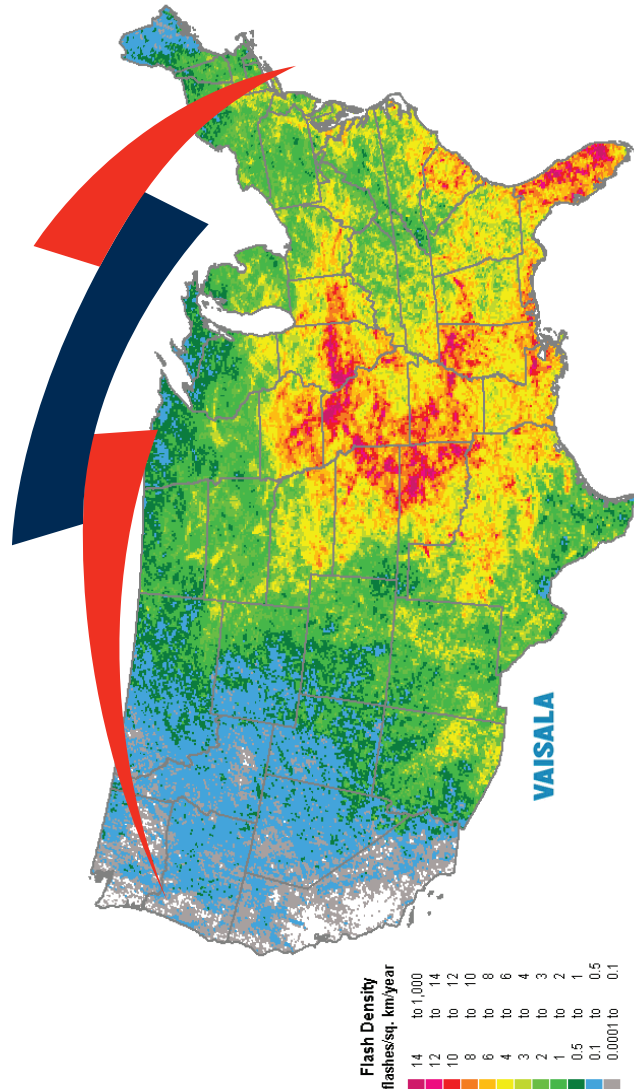

## Service

Lightning protection systems require minimal maintenance. Maintenance *is* required when modifications are made to your home or when your lightning protection system sustains damage. Bonded Lightning Protection Systems, Ltd. performs inspections, repairs, service upgrades, and ground testing on existing lightning protection systems. To keep your lightning protection system in proper working order, Bonded Lightning Protection Systems, Ltd. provides perpetual service agreements. Bonded Lightning Protection Systems, Ltd. protects your home and life by servicing *every* lightning protection need.

## Mission

To protect every vulnerable structure in the United States from the devastation of lightning.

## Protect Your Home and Family

### The Devastating Problem

"Each year, lightning causes **\$4 to \$5 billion** in losses within the United States."

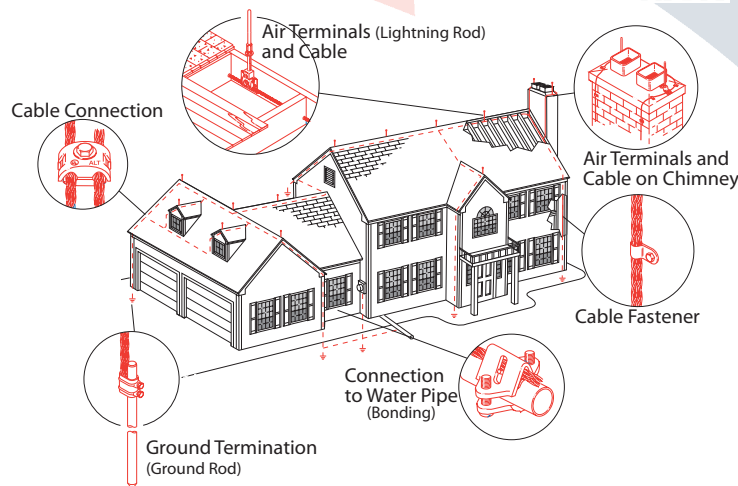

-National Oceanic and Atmospheric Administration (NOAA),  
U.S. Department of Commerce

Apart from the structural damage caused by lightning, your family's well-being, irreplaceable items, and cherished memories are at stake. Lightning causes fires destroying your home, its electrical systems, and expensive electronics. More importantly, the devastation, no matter how minor, will impact you and your family.

### The Only Solution

Protect your home and family with a professionally installed lightning protection system; the *only* method recognized by the Lightning Protection Institute (LPI), Underwriters Laboratories, Inc. (UL), and the National Fire Protection Association (NFPA).

### The Proven System

A lightning protection system provides structural protection for your home by creating specific pathways on which lightning travels. A destructive lightning strike is directed safely into the ground; leaving your home, family, and personal belongings unharmed.

Call Bonded Lightning Protection Systems, Ltd. today for a **free** estimate.

**800-950-7933**

### Surge Protection

Today's homes are especially vulnerable to the havoc lightning causes on sensitive electronic equipment. To assure the highest level of protection, UL Listed Surge Protection Devices (SPD) are available for electronic equipment and utility service entrances.

### Quality Assurance

Bonded Lightning Protection Systems, Ltd. complies with all National Codes governing the specialized field of lightning protection installation. Bonded Lightning Protection Systems, Ltd. utilizes only UL Listed components, installed by trained technicians. For your protection and peace of mind, Bonded Lightning Protection Systems, Ltd., upon request, will perform annual inspections and provide a free estimate for repairs or upgrades to any service issues. See "Service" on reverse side.
